

Royce Industries, Inc.

Royce offers a wide range of value added services. Let us be your partner in producing the best possible product. Royce can assist you with services such as:

Contract Manufacturing/ Assembly

Prototyping to production, Royce can supply you with component parts, value-added sub-assemblies or complete products. Royce is an ideal source for off-loading of peak production demands or for those intensive operations not suited for your in-house production. In addition, we can provide complete testing, engineering assistance and special packaging.

Stocking and KANBAN

Royce will work together with your purchasing staff to establish appropriate stocking levels and safety stock. Working from your Material Requirements, we will provide a continuous, reliable flow of components and / or assemblies right to your manufacturing floor. Royce is also experienced in the Kanban in-house stock replenishment system.

Let us take the responsibility for your critical stock items and help you increase your inventory turns.

Additional Royce Services

Wire Cutting & Stripping: Royce uses the latest wire processing equipment for precise cutting and stripping.

Fitting Taping: Automatic machines can apply the correct amount of Teflon tape for precise fitting insertion.

Customized Testing: Let Royce design a customized test program to insure the highest quality assembly. We can provide function, flow, and leak detection tests with a number of different medias.

Special Packaging: Royce can produce special packaging to ensure proper protection for your device or product while it is in transit. Packaging can incorporate bar coding, instruction manuals, assembly instructions, warranties and more.
